

Comprehensive Environmental Testing Delivers Performance Advantages on Electrak Actuators

In just a few months, the Electrak HD industrial linear actuators have found their way into more and more machine designs thanks in part to their heavy duty construction and unparalleled durability.

Their performance capabilities are no accident, however. Electrak HD actuators have undergone **extensive testing** during the development process and **passed the toughest technical and environmental standards. From hot to cold, wet to dusty, heavy vibration to dropped on the floor**, the aim is to match the real-world environment that our units may be forced to withstand. And these measures help ensure **customers benefit** from:

- 100% performance-tested actuators
- peace of mind in Electrak HD's daily performance
- long, trouble-free and safe operation
- superior total cost of ownership

WEBINAR

UPCOMING LIVE WEBINARS

How to Size and Select Ball Screw Drives for Standard and Custom Applications

From all the thousands of possible choices, how can you quickly and confidently size and select the optimal ball screw solution for your linear motion application?

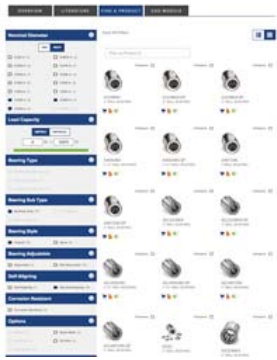

Save your free seat, register today:

**Webinar for OEMs and End Users
(13 December, 2016) >**

**Webinar for Thomson Distributors
(12 December 2016) >**

Enhanced Online Product Selectors

New, improved product selector tools were added to thomsonlinear.com that allow you to easily sort through **more than 65,000 new webpages of rich, technical data** for virtually all standard part numbers.

Try the upgraded selectors for:

- [Industrial linear actuators](#)
- [Linear Ball Bushing bearings](#)
- [Profile rail linear guides](#)
- [Ball screws](#), [lead screws](#) and [glide screws](#)
- More are on the way soon
